Clinical Decision Support

---

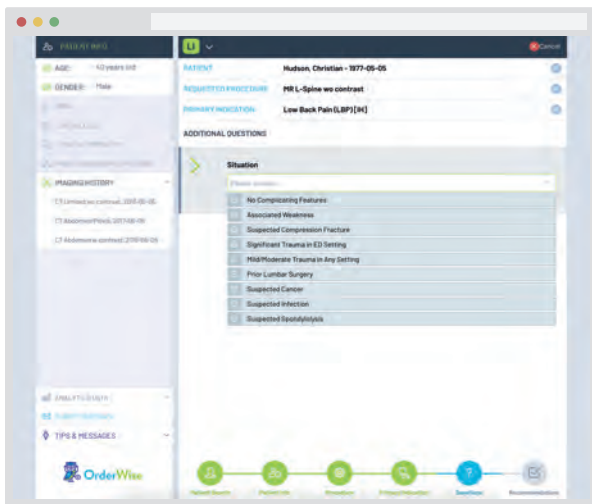

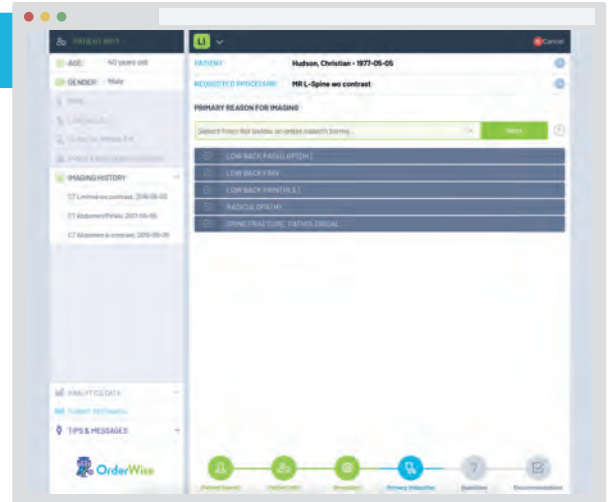

Clinical Decision Support (CDS) is an initiative to enhance the clinical decision-making process with on-demand real-time evidence-based guidance to improve health and healthcare delivery. At MedCurrent, we support our customers to improve quality of care and reduce costs through our innovative and scalable solution *OrderWise*®.

## Decision Support

### Indication Smart Search

- ✓ **Smart search** functionality adapts to local ordering trends and behavior.
- ✓ Includes **3,000+ medical keywords and synonyms**.
- ✓ **Access appropriate use criteria** from multiple sources simultaneously.

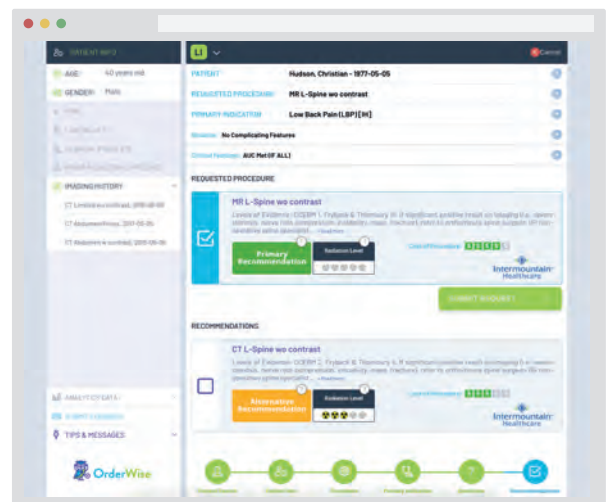

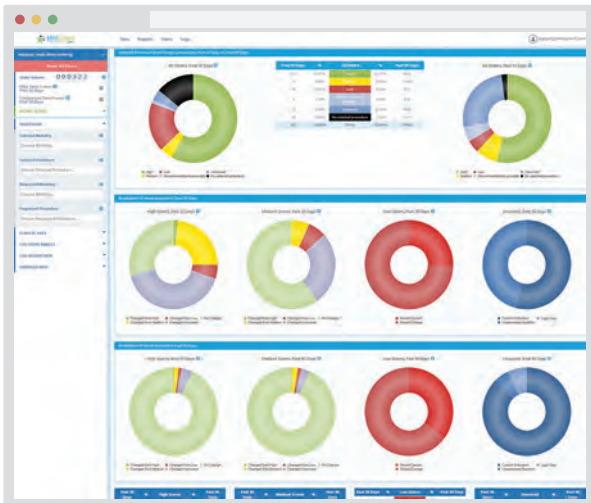

### Streamlined Workflow

- ✓ **Logical questions** to clarify the clinical situation; limited number of steps.
- ✓ **Bi-directional data flow** to the EMR or requesting system to eliminate duplicate entry.
- ✓ Additional **clinical context** through **value-added integrations**.

### Real-time Recommendations

- ✓ **Evidence-based recommendations** with advice text that are easy to understand.
- ✓ **Single-click** to confirm, change or cancel a request.
- ✓ **Analytics and benchmarking** snapshot of clinician referral behavior.

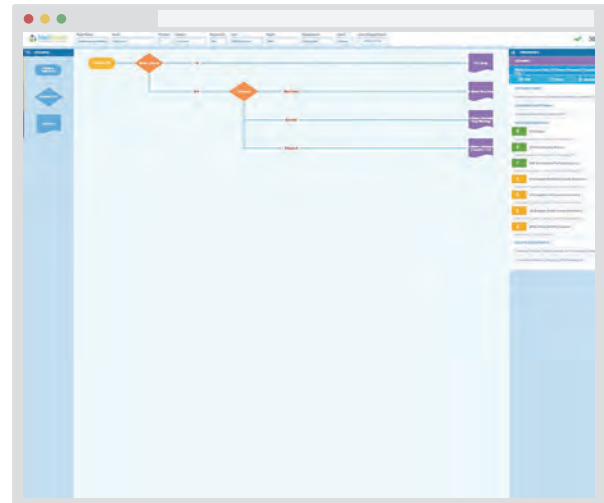

## Actionable Analytics

- ✓ **Real-time performance tracking**, with comprehensive filters and drill-down capability.
- ✓ **KPI benchmarking** to identify clinician outliers and opportunities for improvement.
- ✓ **Easy data export** for custom reporting, data mining and analysis.

## Authoring Studio

## Efficient Content Management

- ✓ **Visual algorithms** to enable efficient management of clinical guidelines.
- ✓ **Customize guidelines** to align with the patient population and local best practices.
- ✓ Enables qualified provider-led entities to **easily develop, modify or endorse clinical guidelines**.

## Appropriate Use Criteria (AUC) & Clinical Guidelines

**OrderWise®** is a decision support mechanism with a universal framework for delivering evidence-based guidelines to clinicians at the point of care. MedCurrent continues to integrate appropriate use criteria (AUC) and care pathways from partners internationally, offering customers with the flexibility to align solutions with local clinical and business needs. This selection of content covers multiple clinical specialties including:

- Radiology (including qPLEs)
- Cardiology
- Oncology
- Lab/Pathology
- Chronic Disease Management

MedCurrent's Authoring Studio and experienced Professional Services team support the development, endorsement and maintenance of clinical guidelines, enabling the customization required to drive successful outcomes and facilitate AUC work for those who have achieved qualified provider-led entity (qPLE) status by the Centers for Medicare & Medicaid Services (CMS).

---

MedCurrent is a physician-founded Clinical Decision Support (CDS) company focused on three core operating principles: improved patient outcomes, lower system healthcare costs, and better patient experience. Centered on a deep EMR integration philosophy, our technology platform streamlines provider ordering by merging evidence-based guidelines with clinical workflows at the point of care. Ease-of-use, configurability, and enterprise scalability make MedCurrent a global leader in CDS solutions.
